RE: California Proposition 65 Compliance Statement

To our loyal distributors and customers,

You will begin to see labels on any product that contains Nickel, Lead, or other key substances contained within the Proposition 65 list beginning in January, 2020.

Though our products do have chemicals/materials that are listed in the "Chemicals Known To The State To Cause Cancer Or Reproductive Toxicity" list, we do not know of any chemical/material used that is over the "Safe Harbor" limit. We are however labeling our products so we can err on the side of safety.

In late 2016, California adopted new regulations relating to the Safe Drinking Water and Toxic Enforcement Act of 1986 – also known as "Proposition 65." The Act and its new regulations update warning requirements for consumer products sold to customers in California that contain certain chemicals identified by the State.

California Proposition 65 requires businesses to provide warnings to Californians, and others doing business in the State of California, about significant exposures to chemicals that are known to cause cancer, birth defects or other reproductive harm. On August 31, 2016, the State of California Office of Environmental Health Hazard Assessment (OEHHA) adopted certain amendments to Article 6, Clear and Reasonable Warnings for California Proposition 65 which became effective on August 30, 2018. For more information on warnings, go to www.P65Warnings.ca.gov.

For any questions, comments or concerns, please contact Russ McKenna. We value your continued patronage and look forward to a new year of business.

Sincerely,

Russ McKenna
Vice President of Engineering
